- Pre-formed cups
- Filter pods
- Direct-fill carton

Dedicated Contract Packaging

When you work with Cloud Packaging Solutions, you get a contract packaging partner that understands your quality requirements, time-to-market demands and budget constraints. You get a partner that treats your product as its own. Cloud's dedication to cost-effective production and one-stop packaging services — from securing the raw materials to distribution — has earned the trust of the industry's best-known brands.

Material Preparation

Cloud can manage all the necessary materials for your final product. We offer ingredients analysis and computerized lot tracking of incoming materials.

Blending

Cloud has a multitude of blending equipment, allowing your product to be processed under one roof. We can even blend your product in multiple stages to ensure a more homogenous mix.

Accurate Filling & Collation

Cloud specializes in meeting the precise requirements of your packaging application. Our capabilities and expertise in high-accuracy packaging are second to none:

- Up to 6 product feeds
- Exact carton accuracy of 99.9%
- 1gm sweetener fill weight accuracy of +/- .03 gm

Production Efficiencies

The Cloud advantage becomes clear with their custom-built HFFS technology and cost-effective processes. With a state-of-the-art facility housing both continuous-motion machinery and intermittent-motion machinery, Cloud can process up to 4,500 pouches per minute while maintaining fill accuracy. The result for our customers is higher efficiencies and yields, along with significant cost savings.

Meeting Your Demands

Whether you need help with overflow, seasonal requirements or product launches, Cloud can meet your low- and high-volume demands. With flexible capacity to operate on a 24/7 shift basis, Cloud can accommodate any size of production run — from a few thousand to a few billion.

Quality

Cloud doesn't just meet your high-quality expectations — it exceeds them. In order

to achieve your product specifications, Cloud has outfitted its facility with control systems, operating procedures and computerized processes, including:

- Ingredient identification and traceability
- Product protection programs that include magnets, metal detectors and screens
- Food safety programs that include allergen control programs
- Internal / external auditing
- Security programs that meet FDA guidelines
- Hazard Analysis and Critical Control Points (HACCP) plans
- Good Manufacturing Practice (GMP)

Laboratory Testing

Cloud can evaluate your product in our in-house laboratory, with rigorous testing of acidity, particle size, moisture content and much, much more.

Audits

Cloud's dedication to quality and proven experience is evident in the success of its many audits, including:

- 12 consecutive superior ratings from the American Institute of Baking (AIB)
- Kosher and organic certification
- Costco (Silliker)
- Cook & Thurber

Secondary Packaging

Cloud's secondary packaging capabilities include cartoning, shrink-wrapping, vertical FFS, display assembly, multi-packs, variety packs, pallet-ready displays and more. This vast assortment of options helps you address your most challenging packaging needs—from seasonal packaging to promotional packaging to different distribution channels to new product launches.

Call Cloud Packaging Solutions today for your contract packaging needs. Let us earn your trust.
